

Dr Ioanna Korbila is a Consultant in Respiratory Medicine at the 2nd Department of Respiratory Medicine, Attikon University Hospital, a clinical center of the National and Kapodistrian University of Athens, Greece. She graduated from the Medical School of the University of Athens. She trained clinically in Respiratory Medicine in several hospitals in Athens, Greece, and she has also worked abroad as a Specialist Registrar in the UK. She initially developed a research interest in respiratory infections. She studied for a PhD degree in Medicine at the Medical School of the University of Crete. Her thesis is on inhaled colistin for the treatment of ventilator-associated pneumonia. She has also done post-graduate studies on Occupational and Environmental Health at the National School of Public Health in Athens. In 2013, she joined the 2nd Pulmonary Department of Attikon Hospital, where she developed a special interest in Interstitial Lung Diseases, following a cohort of IPF patients and participating as a co-investigator in relevant clinical trials. She has co-authored more than twenty papers in international journals.
